OLD EARTH READY FOR BRUSHING BY COMET TO-NIGHT

The earth will probably begin its passage through the tail of the comet between 10:40 and 11:20 o'clock to-night.

Rain began falling in Boston this afternoon. The Weather Bureau announced that the rain will continue most of the night and that the sky will be overcast. This means that Bostonians will probably be unable to see the heavenly traveler to-night.

The passage will last from one to seven hours, probably the latter.

The tail is more than 1,000,000 miles across at the point where the earth will pass through.

The head of the comet this morning was about 16,000,000 miles from the earth.

The tail is about 25,000,000 miles long.

To-night the head of the comet will approach its closest to the earth—14,300,000 miles.

Electrical disturbances attributed to the approach of the comet resulted in confusion in the telegraph services in New York to-day.

The wires appeared to be badly agitated. Reports from a wide area told the same story of trouble and considerable delay was caused, though Boston wires did not seem to suffer much.

MEET AT VELOCITY OF 43 MILES A SECOND.

The earth will pass through the comet's tail about 10,000 miles from the end of the tail.

The earth and the comet's tail will meet at a combined velocity of forty-three miles a second.

Professor Wendell at Harvard Observatory said this afternoon:

"We watched from 12 o'clock midnight to 3 a. m. to-day at the observatory for the comet, but the weather was very bad. While we had a suspicion that we saw the comet, we could not see it as definitely as we wished."

"All weather indications for tonight point to a heavy rain and a stormy night. The comet will be visible only in the early morning hours of the 19th."

"The comet will be visible again on Friday night, but the weather will be very bad. The comet will be visible again on Friday night, but the weather will be very bad. The comet will be visible again on Friday night, but the weather will be very bad."

Bad Weather for the Comet Gazers

WASHINGTON, May 18.—Bad weather is in sight for the comet gazers of New England. The government forecast says the weather will be fair to-night and Thursday in the East and South, except New England, where there will be showers to-night.

Have not the comet gazers? We may pass through the tail and never know it.

The comet is so large that, if it were a solid body, it would probably sweep up all the air in its path between the earth and the comet. There might be a vacuum in the space between the comet and the earth.

PRESTON IS FEARFUL OF SEASLED

NEW YORK, May 18.—The Rev. Father Angelo Preston, assistant priest of the church of Our Lady of Carthus at North Fifth street and Chatham square, Boston, was told from the altar today that he was celebrating mass today and was attacked by an enemy who cut his throat and sliced his face to ribbons.

The priest, dying, was taken to the home of his mother, a block away.

The police began an investigation of the theory that the attack was the result of Father Preston's crusade against disorderly houses in his parish and activity in aiding the police and the alcohol attorney's force in the war on the white slave traffic.

While he was at the altar the priest was presented with a note asking him to hurry to No. 75 Skillman street to disambiguate the law to a dying man. Herring through the mass, the priest slipped from his vestments and was killed almost instantaneously. The priest was taken to the hospital, but he died before he could be taken to the hospital.

The few people on the street saw the priest's assistant run to the nearest corner and escape. Within a few minutes the tenements about were emptied, a panic-stricken crowd of thousands filling the streets. The police reserves were called out. Dr. Conolly, summoned from St. Catherine's Hospital, declared the priest to be fairly hurt. The victim's dying wish was to be taken to his mother's home was observed.

Within a few minutes the priest's home began a house to house search for the assassin.

George W. Coleman, writer of the Cambridge City National Bank, was to-day sentenced to serve fifteen years in the Franklin County Jail at Greenfield by Judge Clarence Hale in the Circuit Court.

The bank thief took the sentence with the stoicism of an Indian. His friends were disappointed. They hoped that he would not get longer than about one-third of that time. William A. Morse, Coleman's counsel, asked that he be sentenced to serve five years.

THREE DEAD IN NEW YORK FIRE

NEW YORK, May 18.—A fire of mysterious origin, starting early today on the second floor of the three-story brick building, No. 73 Sullivan street, caused the death of three persons and the probable fatal injury of two others. All of those buried were members of one family.

The two other families in the house, awakened in time, were forced to flee down the fire escape after the stairways and hall were filled with smoke.

Policeman Donnelly, who smoked smoke as he was passing the building and who dashed into the place after learning in an alarm, said that he caught an odor of oil. None of the residents of the building would admit ever having received threats from blacksmiths or any one else, and the police have removed the incendiary theory pending an official report of the cause of the fire.

Hall, it is expected, will plead guilt and sentence will probably be imposed at once. Lawyer George A. Cassell will appear for Hall and will make a plea of insanity.

The legislative committee found that the larceny of Hall from the savings bank totaled over \$102,000. He was allowed to be short in his accounts on trial at Worcester since he returned to himself.

FANCY BEEF CUTS CHEAPER

CHICAGO, May 18.—A reduction of one-half cent a pound in the price of the better grades of dressed beef cuts was announced today, while cheaper grades remain the same.

Packers said that since the public has weakened to the fact that beef plates, chops and rounds are as nutritious as beef steaks and ribs even though their cost is much less, the demand for the cheap cuts has doubled. Consequently, they say they were compelled to reduce the cost of ribs and loins in order to equalize the demand for the inexpensive parts.

This latest reduction brought southern one rib to 14 cents and number one loins to 15 cents a pound, as compared with 17 1/2 and 22 cents in January.

Few of Us Have Seen It, but All Are Interested, and Many Seem to Be Worrying About It: THE WORRY IS WASTED

None of these things will happen.

Unfortunately, there are some superstitious, ignorant imaginations that cannot look upon anything unusual without fear. Their minds are rather close to the animal mind, and they are akin to the horse that shies a thousand times in succession at an automobile or a scrap of paper.

flying bodies might possibly strike the earth and destroy us. But if we did, we should never know it, we should never have time to think about it, and, sad to relate, neither we little earth dwellers nor our solar system would be missed in the vast cosmic mechanism in which suns, planets, comets and nebulae play their part.

THE CRISIS NOW CONFRONTING THE ENGLISH

Written for the Boston American
By Dr. C. H. Parkhurst

On the Civil War, and undertaken so shortly, after 1782. It would probably have been the ruin of our national life; but when, after eighty years, the outbreak came, we had history enough behind us to brace us against assault. We were strong in great names, national interests, associations and traditions.
